Potential Exponential growth

Verde has partnered with some of the world leaders in agriculture. Together, these companies cultivate more than **2,800,000 hectares**.

\$60M CAD invested to date,
Market Cap of just \$36M CAD

What is SuperGreensand?

The Greensand you know just got better

Greensand is highly appreciated by your plants because it is a rich source of glauconite.

Super Greensand® carries glauconite as the Greensand you already know, but it offers much more to help your plants grow even stronger and healthier.

Why Super Greensand® is better?

	SUPER GREENSAND	Ordinary Greensand
The older the better	570 million years	55 million years
More potash the better	10%	6%
The finer the better	Micronized	Coarse

50 years worth of Potash if supplying Brazil's entire current consumption

	Tonnage (Mt)	Average grade (%K ₂ O)
Total Measured	83	10.13
Total Indicated	1,389	9.23
Total Measured & Indicated	1,472	9.28
Total Inferred	1,850	8.60

5 reasons to use Super Greensand®

- 01** Contains potassium, iron, magnesium, silicon and over 60 other trace elements
- 02** Improves chemical, physical and biological conditions of the soil
- 03** Improves moisture and nutrient retention capacity of the soil
- 04** Helps loosen compacted clay soils
- 05** Provides plant available silicon, proven to strengthen plants
