NOTES TO THE GROUP FINANCIAL STATEMENTS

1. Nature of operation and going concern

In February 2017, the Group announced the award of an required environmental licence and a trial mining licence.

The Directors have prepared cash flow forecasts for the Group which, following the financing of approximately $1.8 million completed in July 2017, show that the Group has sufficient working capital for at least the next twelve months. Following the award of the necessary licences, the Group has commenced small scale mining operations and the forecasted cash flow projections include a small contribution from trial mining product sales.

There are risks associated with the commencement of any new mining operation whereby unforeseen technical and logistical events result in additional costs needing to be incurred, giving rise to the possibility that additional working capital may be required. In addition, the Group currently does not have any formal agreements for sale of its product.

Should a lack of suitable buyers be found, there are delays in generating revenue, or additional working capital be required, the Directors consider that further sources of finance could be secured within the required timescale.

On this basis the Directors have therefore concluded that it is appropriate to prepare the financial statements on a going concern basis. However there is no certainty that such additional funds either for working capital or for future development will be forthcoming and these conditions indicate the existence of a material uncertainty which may cast significant doubt over the Group's ability to continue as a going concern and therefore that it may be unable to realise its assets and discharge its liabilities in the normal course of business. The financial statements do not include the adjustments that would result if the Group was unable to continue as a going concern.

2. Significant accounting policies

Verde is a company domiciled in England and Wales. The interim statements of the Company for the second quarter ended 30 June 2017 comprise the Company and its subsidiaries (together referred to as the "Group"). The Group is primarily involved in the acquisition and development of mineral resource assets. The interim financial statements have been drawn up in accordance with International Accounting Standard 34 'Interim Financial Reporting' issued by the IASB and as adopted by the European Union.

The financial information contained in this interim report does not constitute statutory accounts as defined in section 435 of the Companies Act 2006. No statutory accounts for the period have been delivered to the Registrar of Companies. The financial information contained in this interim report has not been reviewed or audited by the Company's auditor.

The accounting policies and methods of computation used in the preparation of the unaudited consolidated financial information are the same as those described in the Company's audited consolidated financial statements and notes thereto for the year ended 31 December 2016. The annual financial statements are prepared in accordance with IFRSs as adopted by the European Union and with IFRSs and the interpretations issued by the IASB.

In the opinion of management, the accompanying interim financial information includes all adjustments considered necessary for fair and consistent presentation of financial statements. These interim consolidated financial statements should be read in conjunction with the Company's audited financial statements and notes for the year ended 31 December 2016.

The statutory accounts for the year ended 31 December 2016 have been filed with the Registrar of Companies. The auditors' report on these accounts was unqualified and did not contain a statement under section 498(2) or 498(3) of the Companies Act 2006.

NOTES TO THE GROUP FINANCIAL STATEMENTS

3. Operating segments

IFRS 8 Operating Segments requires operating segments to be identified on the basis of internal reports about components of the Group that are regularly reviewed by the Chief Operating Decision Maker, C Veloso, in order to allocate resources to the segments and to assess their performance.

The Group's operations relate to the exploration for, and development of mineral deposits with support provided from the UK and as such the Group has only one segment.

4. Loss per share

Basic loss per share

The calculation of basic loss per share at 30 June 2017 was based on the loss attributable to ordinary shareholders of $716,000 (30 June 2016: $612,000) and a weighted average number of ordinary shares outstanding during the period ended 30 June 2017 of 37,617,430 (30 June 2016: 37,617,000) calculated as follows:

Loss attributable to ordinary shareholders

	6 months ended 30 Jun 2017 $'000	6 months ended 30 Jun 2016 $'000
Loss for the period	**(716)**	(612)

There is no difference between the basic and diluted loss per share because the Group's loss means that any potential dilutive shares are antidilutive.

Details of share options that could potentially dilute earnings per share in future periods are set out in note 8.

The Group's objectives when managing capital are to safeguard the entity's ability to continue as a going concern so that it can continue to increase the value of the entity for the benefit of shareholders. Given the nature of the Group's current activities, the entity will remain dependent on equity funding in the short to medium term until such time as the Group becomes self-financing from the commercial production of mineral resources.

8. Share-based payments

The number and weighted average exercise prices of share options are as follows:

	Weighted average exercise price 30 Jun 2017	Number of options 30 Jun 2017	Weighted average exercise price 31 Dec 2016	Number of options 31 Dec 2016
Outstanding at the beginning of the period	**$0.58**	**2,609,000**	$0.65	2,667,000

Exercisable at the end of the period	**$0.49**	**1,512,999**	$0.78	1,103,000

The options outstanding at 30 June 2017 have an exercise price in the range of $0.40 to $0.83 and a weighted average remaining contractual life of 7.4 years. Options issued prior to December 2014 vest in three annual tranches commencing on the date of grant subject to the grantee's continued service. Options issued in and after December 2014 vest in six annual tranches. Commencing on the date of grant, subject to the grantee's continued service, 10% of the options vest and an additional 10% vest each subsequent year. At the sixth year from the date of grant, the remaining 50% of the options vest. Options issued in January 2017 vest in 2 annual tranches, 50% on the commencing date of the grant and a further 50% a year after, subject to the grantee's continued service. At 30 June 2017, 1,512,999 of the options had vested (31 December 2016: 1,103,000).

9. Financial instruments

The Board of Directors determines, as required, the degree to which it is appropriate to use financial instruments and hedging techniques to mitigate risks. The main risks for which such instruments may be appropriate are foreign exchange risk, interest rate risk and liquidity risk each of which is discussed below. There is no perceived credit risk as the Group and Company have no trade receivables and minimal other financial receivables and bank deposits are made with financial institutions considered to be safe by the Board of Directors. There were no derivative instruments outstanding at 30 June 2017.

Foreign currency risk

The Group's cash resources are mainly held in Canadian Dollars and Brazilian Reais. Exchange rate fluctuations may adversely affect the Group's financial position and results. The Group's financial results are reported in Canadian Dollars and its costs are primarily incurred in Canadian Dollars and Brazilian Reais.

The appreciation of the Brazilian Real against the Canadian Dollar could increase the actual capital and operating costs of the Group's mineral exploration projects and materially adversely affect the results presented in the Group's financial statements. Currency exchange fluctuations may also materially adversely affect the Group's future cash flows from operations, its results of operations, financial condition and prospects. The Group has a general policy of not hedging against foreign currency risks. The Group manages foreign currency risk by regularly reviewing the balances held in currencies other than the functional currency.

The Group and Company had the following cash and cash equivalents in various currencies including its presentational currency. The amounts are stated in Canadian Dollar equivalents:

	30 Jun 2017	31 Dec 2016
	$'000	$'000
Canadian Dollars	**738**	1,705
Brazilian Reais	**180**	28
British Pounds	**17**	30
	935	1,763

At 30 June 2017 the Canadian Dollar deposit was held on a deposit account, at an interest rate of 0.8%. The Brazilian Reais deposits are held as interbank deposit certificates, with no maturity date and track Brazil's short term interest rate which is currently 9.25%.

9. Financial Instruments (continued)

Foreign currency risk (continued)

Foreign currency risk sensitivity analysis showing a 10% weakening/strengthening of the Brazilian Reais against the Canadian Dollar with all other variables held constant is set out below. 10% represents managements' assessment of the reasonable possible exposure:

	Equity	
	30 Jun 2017	31 Dec 2016
	$'000	$'000
10% weakening of Brazilian Real	**(32)**	(13)
10% strengthening of Brazilian Real	**40**	16

Liquidity risk

To date the Group and Company have relied on shareholder funding to finance its operations. As the Group and Company have finite cash resources and no material income, the liquidity risk is significant and is managed by controls over expenditure and cash resources. In addition, the Group and Company do not have any borrowings and only have trade and other payables with a maturity of less than one year. Further details of the liquidity position are explained in note 1 regarding going concern.

Interest rate risk

The Group's and Company's policy is to retain its surplus funds on the most advantageous term of deposit available up to twelve month's maximum duration. Given that the directors do not consider that interest income is significant in respect of the Group's and Company's operations no sensitivity analysis has been provided in respect of any potential fluctuations in interest rates.

Financial assets

The floating rate financial assets comprise interest earning bank deposits at rates set by reference to the prevailing LIBOR or equivalent to the relevant country.

Fair values

In the directors' opinion there is no material difference between the book value and fair value of any of the Group's and Company's financial instruments.

Classes of financial instruments

The classes of financial instruments are the same as the line items included on the face of the statement of financial position and have been analysed in more detail in the notes to the financial statements. All the Group's and Company's financial assets are categorised as loans and receivables and all financial liabilities are measured at amortised cost.

10. Subsequent events

On July 25, 2017 the company announced it had closed the non-brokered private placement financing issuing 1,727,075 units at $1.05 per unit for total proceeds of $1,813,500. Each unit is comprised of one ordinary share and one share purchase warrant. Each share purchase warrant is exercisable to purchase an ordinary share at a price of $2.00 for a period of two years.
