“Super Greensand™: A New Product for Organic and Sustainable Agriculture”

Verde is pleased to announce a new product development, Super Greensand™. This opportunity is a direct result of the Company’s ongoing commitment to agri-tech innovation.

Super Greensand™ is expected to be used both as a fertilizer and as a soil conditioner. As a fertilizer it provides potassium, magnesium, silicon, iron and manganese. As a soil conditioner it increases the soil’s capacity to retain water and nutrients. As a 100% natural product Super Greensand™ will be certified for use by organic agriculture. Verde will progress with product registration in Brazil and the United States.

MORE THAN A FERTILIZER

TK47™ is a multi-functional, innovative product that provides benefits for crop nutrition, crop protection, soil improvement and increased sustainability.

SUPER GREEN SAND

100% NATURAL

Super Greensand™ is both a fertilizer and a soil conditioner. Rich in minerals and 100% natural, it is ideally suited for organic agriculture.
